stand the challenges in the manufacturing

Jaypee believes sky is the limit for success but trust of its consumers is the ladder to that success.

process and the opportunities to improve productivity. We have achieved great success by empowering every user in the enterprise with the tools to benchmark, automate and improve performance of their manufacturing tasks.

Since its inception in 1982, Jaypee India Ltd has constantly upgraded its portfolio with diverse offerings, challenging projects and impressive clients. This reputation is built on

Today, Jaypee's wide range of products includes Rebar Bending Machine, Bar Cutting Machine, Batch Mix Plant, Concrete Mixer, Mini Dumper, Walk Behind Vibratory Roller, Tower Crane, Passenger Hoist, etc. With the consistent efforts of our advanced R&D unit, we have introduced several new models, innovative designs, and improvisations in our range of products.

Jaypee Projects Limited is a part of the Jaypee group with its focus on Construction, Civil and Structural Engineering Projects and contracts. Mr Jay Mehta Chairman Jaypee Group founded Jaypee Project Limited in 1994 as a construction company, Jaypee Projects has successfully defined its objectives and positioned itself as one of the leading organization in the construction industry. Jaypee has many prestigious projects in its folds and is always acknowledged as a reliable and professional construction company.

Having constructed Roads and Rail-over-Bridges, residential and commercial buildings, hospitals, educational institutions, Jaypee Projects is one of the leaders in the industry. With strong workforce of qualified construc-

UIC Udyog Ltd.

UIC Infrastructure India Private Limited, a unit of UIC Group, is a fast growing Civil Engineering and Construction Company with specialists in the field of Infrastructure development.

Our efforts are to establish it as a preferred and proven name in the field of Infrastructure development through our determined efforts and work force that aims quality. We believe that construction of assets for the Country of high quality is the purpose of our being in the construction business. We ensure

concrete blocks, including preparation of its design and drawings in Kidderpore-Diamond Harbour Road; Construction/ replacement of Railway bridges at Garia, ROB at Convent Road, both being challenging job involving fabrication and erection of steel girders on the busiest South Section of Sealdah Division of Eastern Railway; and the Work of planning, designing and execution of Civil works (including sanitary & plumbing), Electrical works, and Internal designing & execution of the East West Metro office at St. George's Gate Road, Kolkata.

sectors.

Infrastructure sector in India has undergone impressive transformation in the last few years. For speedy progress of our country, the development of Infrastructure in Cities and multi-modal transport connectivity are very vital. So the 10th 5 year plan has given due importance to the Construction industry which is now poised for a boom in coming years. The total investment is

expected to be to the tune of Rs. 16,00,000 crores during the above plan period. Lots of Infrastructure development works, like housing and urban Infrastructure and transport connectivity are also going on in West Bengal now, but much more remains to be done to keep pace with its industrialization.

Infrastructure development projects in most cases need close coordination among different Government or Semi-government departments. Lack of such coordination in some cases poses problems in project implementation causing cost and time over-run. Construction projects also

suffer due to unpredictable hikes in the prices of the essential construction materials, especially steel and cement, when no provision is kept for the compensation in the Contract.

The company is aiming gradually to diversify into the various fields of Infrastructure development like Construction of major bridges with concrete or steel superstructure on pile/ well foundation, Flyovers and interchanges, Industrial & Civil aviation Infrastructure, Real estates, urban drainage and water supply schemes etc.

"absolute quality" through our specific Quality Assurance Procedure/ System for all the construction activities starting from the procurement of materials. Our management audits the view to ensure its total compliance.

The important projects handled /being handled by the company include Improvement of Tram Track by renewing Tram Rails placed in high grade concrete or

The company is aiming gradually to diversify into the various fields of Infrastructure development like Construction of major bridges with concrete or steel superstructure on pile/ well foundation, Flyovers and interchanges, Industrial & Civil aviation Infrastructure, Real estates, urban drainage and water supply schemes etc. Our ultimate aim is to become a premier construction company in India by way of large expansion of its existing activities and adverts into new
